This program's aim is to increase the player's personal skills to the next level. Using Futsal at a platform for high speed, high volume ball touches and maneuvering in tight spaces. A typical Futsal game allows the player to touch the ball up to 600% more than traditional soccer, thereby increasing the player's decision making skills and comfort with the ball. A Futsal ball is much smaller and heavier, which allows the player to easily command the ball and in return, increase confidence that seamlessly transforms to a soccer game.
